## Media Statement

### For immediate release

**Date: 02 June 2022**

### **Alternative water supply plans for the Planned Rand Water Shutdown: 3 June 2022**

Johannesburg Water (JW) would like to remind the residents of the Rand Water shutdown planned to take place tomorrow, 3 June 2022. The shutdown is due to the installation of a new non-return valve on pumpset 20 at the Vereeniging Water Treatment Plant and, to tie-in the newly installed F46 pipeline to the existing F34 pipeline. The water supply to the Eikenhof Booster Station will be reduced by 50% and this will affect several areas in JW's area of supply.

The duration of the shutdown will be for 24 hours, starting at 5am and it will take approximately 3-5 days for the system to adequately recover after supply has been fully restored. JW has thus ensured that plans are put in place to supply the affected residents with water.

**The following are the alternative water supply plans for the affected areas:**

#### **Langlaagte Depot:**

| <b>Meter affected</b>      | <b>Reservoir affected</b>  | <b>Affected suburbs</b>            | <b>Tankers locations</b>                       |
|----------------------------|----------------------------|------------------------------------|------------------------------------------------|
| <b>CORRIEMOOR METER</b>    |                            | <b>Fairland</b>                    | <b>Roaming trucks</b>                          |
|                            |                            | <b>Northcliff &amp; Extensions</b> |                                                |
|                            |                            | <b>Blackheath</b>                  |                                                |
|                            | <b>Fairlands Reservoir</b> | <b>Berario</b>                     |                                                |
