

DAILY WATER SUPPLY SYSTEM STATUS UPDATES

Water supply status update by exception (i.e., areas affected due to supply constraint and not service interruption from occasional pipe burst). **Monday, 22 January 2024 (Morning)**

UNPLANNED MAINTENANCE

REGION F

Areas affected: Johannesburg CBD and surrounding areas.

The Hector Norris pump station was affected by a City Power outage on Sunday, 21 January, where a case of vandalism affected the power supply. As an interim intervention, the pump station is running on a generator.

Although water supply is slowing being restored, it will take several hours for full restoration of the network. Most areas should have water, however; some are still affected by poor pressure to no water, particularly high-lying areas.

PLANNED MAINTENANCE

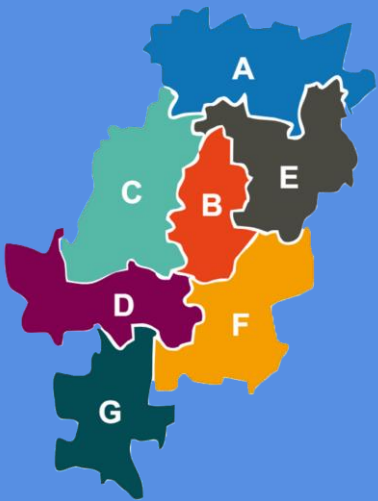

REGION D

Areas affected: Diepkloof (all zones), Power Park, Orlando eKhaya (old power station), and Elias Motswaledi

Rand Water conducted a planned maintenance on three water meters in Soweto from Sunday, 21 January at 06:00 until Monday, 22 January at 06:00.

Although the work was completed, the system will gradually recover throughout Monday.
