Systems update

In recent weeks, Johannesburg Water has faced water supply disruptions. However, there are signs of improvement in our systems. Our dedicated technicians are diligently working to reconfigure the systems to boost supply.

Sandton System

The systems will be closed to boost capacity in the overall storage, and the systems of Johannesburg Water. The following reservoirs will be throttled overnight:

- Linbro Park reservoir
- Morningside reservoir
- Malboro reservoir
- Illovo reservoir
- Bryanston reservoir

The two direct feeds will be impacted by no water overnight:

- Linbro and Malboro

Johannesburg Central reservoir

Pumping will be reduced overnight for Yeoville and Foresthill to boost overall capacity of Johannesburg Water system. Poor pressure to no water is expected in the supply zone.

Berea and Alexander Park reservoir

Both reservoirs are constraint and improvements are expected overnight.

Commando System

Currently, the system is under constraint and Johannesburg Water has placed interventions in place to boost supply and monitor improvement.

Deep South Region

- Orange Farm, Ennerdale and Lawley reservoirs – all reservoirs are critically low due to high demand. Poor pressure to no water can be expected in the supply zone.
- Lenasia Hospital Hill and Lenasia High Level reservoirs – both reservoir levels are critically low and supplying fairly. However, poor pressure to no water is expected due to high demand.

Directors:

Mr Sipho Mthembu (Chairperson), Mr Ntshavheni Mukwevho (Managing Director and Executive Director),
Mr Phetole Modika, Mr Siphamandla Mnyani, Mrs. Zandile Meeleso, Mr Pholoso Matjele, Mr Kgaile Mogoye,
Mr Molate Mashifane, Ms Pamela Mabece, Mr Lunga Bernard, Mr Julias Maphutla

Roodepoort System

As a measure of intervention, Johannesburg Water will curtail certain components within the Roodepoort system to boost the overall capacity of Johannesburg Water. Subsequently, poor pressure is expected in the Roodepoort area.

Soweto System

As part of the intervention Johannesburg Water will curtail some of the Soweto system to boost the overall capacity of Johannesburg Water. Poor pressure to no water is expected in some parts of Soweto while the interventions are in place.

Randburg System

Linden1, Linden 2 and Kensington B reservoir – supply has improved, and the reservoir has been supplying fairly throughout the day. However, levels are still low and poor pressure can still be expected in the supply zone.

The following systems are not yet at acceptable levels of recovery:

- Blairgowrie reservoir
- Linden 1 reservoir
- Kensington B tower

Johannesburg Water has been reconfiguring the network as part of their intervention to bring relief to the constraint systems and boost supply of the systems that have not yet been restored.

Johannesburg Water continues to monitor all affected systems. Outlets of the critically low reservoirs will be throttled overnight to build capacity for the next day.

Alternative water supply is currently provided to affected areas.

List of affected reservoirs: <https://www.johannesburgwater.co.za/johannesburg-water-reservoirs-3/>
