Johannesburg Water wishes to inform residents that critical systems (reservoirs and towers) are being monitored. Below are this morning's updates:

- Commando system:
(Brixton, Crosby and Hursthill)

Brixton systems:

Currently the reservoir is at 40% capacity. The tower is operating normally, with 1 pump running. The outlet of Brixton reservoir is opened at 50%

Crosby reservoir:

The reservoir is stable.

Hursthill reservoirs:

Hursthill 1 reservoir is at 12% capacity, while Hursthill 2 has improved to 10% capacity this morning.

- South Hills tower:

The lack of continuous supply to South Hills tower has been escalated to Rand Water. At this stage, there is no flow received at the tower. Customers in the tower zone will be impacted by no water. Alternate water supply will be provided to affected customers.
