There is a planned Rand Water shutdown that will take place for 17 hours from 07:00 to midnight on Wednesday, 9 August 2023. The shutdown will impact various areas around Soweto. The purpose of the planned maintenance is for Rand Water to repair leaking bypass pipelines, as well as valves on the F33, F40 and F44.

Customers are encouraged to store sufficient water, at least two days before the outage (Monday, 7 August). Johannesburg Water also urges customers to use water sparingly during the shutdown.

- All Tshepiso (phases one to seven)
